

Nyumba na Jua – the perfect landlord for businesspeople

Nnj owns apartments directly in the city of Dar es Salaam.

All accommodations are nearby: restaurants, bars, supermarkets, schools et cetera.

But very important is the fact that Tanzania is an economically highly interesting country.

Foreign politicians realize that fact more and more.

Indian and **Arabian** companies are connected to Tanzania already by tradition since generations. **Chinese** companies are means of building the new silk road and **European** businessmen start to understand that Tanzania is not just an agricultural country but having many and economically needed minerals and, finally, having many possibilities of producing **alternative and sustainable energy**.

That's the reason that the apartments of Nnj are favored by businesspeople from all over the world, like

- owners of companies
- managers
- consultants
- legal and tax advisors

staying in Dar es Salaam for long term (means more than a year), medium term (as three months up to one year) or sometimes even short term (from 1 week to three months).

All accommodations can be taken as granted. Wi-Fi is available so that businesspeople before or after their work in the office can be busy in the apartment. Some of our guests indeed established a home office and worked from the apartment connected to their office in the home country as well as to their Tanzanian office.

Nnj is specialized in hosting these valued guests.
